THE HARBOURAGE [safehouses for trafficked victims]

public is familiar with in some shape or form this degradation of the age of 18, including boys and girls as young as 4 years old. (CIA are foster homes prepared to give these victims the attention they human life, few are familiar with its existence within the United & USDOJ) Fortunately, there are organizations, both private and need. The care for these victims should be a lifelong commitment States. Not under lack of concern, but under a lack of awareness. federal, that are constantly working to rescue those involved and Organizations need to take responsibility for the lives of these The reality is that every year, nearly 50,000 women and children arrest those responsible; however this is just the first step. The women and children in order to give them the specific care and

100,000 U.S. women and children are sold for sexual services into foster care. Those who are too old, are simply released. **This** within the United States every year. 50% of these victims are under is the real tragedy because no rehabilitation takes place and rarely

are brought into the United States for sexual exploitation and over women and children that are rescued under the age 18 are placed attention they need.

FL that takes in (nondiscriminatory) victims of sexual trafficking. these safehouses, the residents will learn to operate as a family unit consisting of six to eight persons per household with one or two house parents. They will be counseled, taught, and ultimately reintroduced to a stable life through a safehouse that holds no age bias and places no limit on the duration of stay. All are treated on a individual rehabilitative basis and all are given an equal opportunit to live in peace.

the residents at the Harbourage will be seamless.

adult has the opportunity to take responsibility in Nature, he or she will reap what is sown.

through pure living In a world where the last thing that these adolescents are exposed to is pure, it is very important to employ le, natural and sustainable ideas that bring about pure living. ecting with natural function builds upon ones innate ability to operate simply and efficiently. Humans need this con order foster creativity and productivity. So commonly are children separated from nature and consequently cannot appreciate the things they are given, the food that they eat, or the environment they live in. At the Harbourage, each resident is required to take ty in the day to day functions of the house and be involved in every aspect of a sustainable life.

[through fidelity] The essence of trafficking is rooted in deception and altering one's concept of reality. It creates a world that is inconsistent and intrusive. Therefore the goal is to design spaces that allows its user to imprint and form a strong relationshi with his or her built environment. The spaces are meant to be very tangible and adherent to a connection to the surrounding

No matter what the situation, people need to find truth. Whether religious or not, the one thing that is true is the world around us. Life is difficult enough and the last thing that someone needs is an environment that discourages contemplation. Nature is a constant truth that bridges all beliefs. With this element in the ar ion is laid for answering life's biggest questions.
